Introduction

■ Welcome to the world's first-ever icon-driven adventure: **Shadowfire** – rescue from Zoff V

Mission background

■ As this time starships can jump from star to star using their **hyper-drives**. They are unable to jump into planet's orbit. General Zoff, traitor to the Empire exploits this situation. His skyfortress, Zoff V, lurks behind the perilous asteroid belts which ring planet Nargol. There he plots the conquest of the Empire's peaceful worlds.

■ However, plans for a new kind of starship do exist. They propose a craft called **Shadowfire**, able to jump from planet to planet. If Zoff had the plans he could ravage any part of the empire. If the Emperor had the plans he could destroy Zoff.

■ Unfortunately Ambassador Kryxx has the plans, hidden in a micro-disk embedded in his spine. The ambassador is held captive aboard Zoff V in a few short hours Zoff's inquisitors will discover the plans, unless the Empire's Enigma team can rescue Kryxx.

■ Enigma is a shadowy organisation dedicated to the Emperor's service. Its operatives are the cream of the Empire's legions, the worst of its criminal scum or the latest developments in cybernetics. Its mission controllers are dedicated. That is why you have been chosen to head this mission. The Empire commands four teams await:

Game objectives

■ You have one hour and forty minutes to accomplish the **Shadowfire** mission. Using the abilities of the Enigma team you must locate and rescue Ambassador Kryxx, apprehend and capture General Zoff, then capture or destroy the starship Zoff V. You can accomplish these tasks in any order.

■ The mission opens with the Enigma craft moored alongside Zoff V. Your first task is to brain some or all of your team aboard using the abilities of the droid **Manta**.

■ We recommend you briefly read this booklet before undertaking the mission. The instructions which appear under the heading **Mission Briefing** will help you to begin play fast. You may also be aided by the game's self-display facility. This begins after the first screen is reached. You can exit the self-display mode at any time simply by pressing any key.

Loading instructions

■ Commodore 64 (Cassette) Press SHIFT & RUN on the computer, then PLAY on your cassette player (DBC) Type LOAD  then press RETURN. Spectrum/Spectrum Plus (Cassette) Type LOAD  then press ENTER on the keyboard. Next press PLAY on your cassette player.

1. Getting started

■ During loading you will see the colourful **Shadowfire** title screen. After loading you will be presented with a selection menu. You can choose any of the following means to control the Enigma characters:

Commodore: Keyboard F1, Digital joystick F3, Analog joystick F5, Light pen F7

Spectrum: Keyboard 1, Kempston 2, Protek 3, Sinclair 4, Fuller 5

■ v If disc was the selected medium the transfer is completed. If cassette is the medium you will be prompted on screen to press the appropriate cassette keys.

■ vi If you have been loading an old game, return to the game start/save menu. Here select the **Old game** option. You will then re-enter the **Shutdown** mission.

■ In the event of cassette save/load failure press Run/Stop (CBM 64) or Break (Spectrum)

4. Enigma team screen

Here are displayed the surviving members of the Enigma team. Move the cursor over the character of your choice and enter your command. You will be presented with the chosen character's status screen. (Commodore users will note two arrows in the top right hand corner of the screen. Select the up arrow to turn the background music on. The down arrow turns the music off).

Mission briefings: If this is your first **Shadow of the Beast** mission select the character **Mantis**, the lone character at the top of the Commodore display or third from left in the picture display.

5. Character status screen

Each Enigma character has four screens: Status, Objects, Movement and Battle. This is the first. The cartoon show:

Agility: This bar shows the speed of movement possible for each character.

Strength: The green bar indicates the strength (or weakness) of a character. It may change length during the mission.

Stamina: This bar is most likely to decrease during the mission. It shows the physical endurance of each character.

Weight: When a character picks up an object a green bar will appear. If the object is too heavy the bar will turn red. Simply drop an object(s) to restore the bar to green.

Hint: Strength, Speed, Agility and Weight are all connected. Some characters are stronger, some faster, some have more stamina and some can carry more. (Consider the hints under each of the character's PROFILES elsewhere in this manual). Weakened characters may recover during the mission.

- You will note three different coloured monitor icons on the right of the screen:

- Green monitor:** Gives access to the character's Movement Screen

- Yellow monitor:** Gives access to the character's Objects screen

- Red monitor:** Gives access to the character's Skills screen

- Go to:** Select this icon when you have completed a task and wish to return to a previous screen. This icon can also be used to cancel a command.

Mission Briefings: Select **Manto's** yellow monitor and enter his Objects screen

6. Objects screen

- You enter this screen by selecting the **Yellow Monitor** icon on any screen connected with the character in play. This screen enables you to command a character to manipulate objects.
- The screen illustrated below belongs to the **Manto** character at the start of the mission. As left are the objects in the same location as **Manto**. In the middle are the objects carried by the character (there will be none at the start of the mission). Along the bottom a bar will register the weight of objects carried.
- On the right of the screen are the icons which allow you to manipulate objects.

Activate: To arm a weapons system, start a transporter pad, begin a self-destruct sequence, etc.

Ready for use: This icon lets you select which object a character will hold ready for immediate use. Move the cursor over the icon desired on either the left or inside sections of the screen and press ENTER. The object will appear below the icon.

Hint: Make sure you use this icon when you arm a character, otherwise they will be obliged to use their hands in combat!

Pick-up: An object. Move the cursor over this icon and press ENTER, then select the object of your choice and press ENTER. The item will appear in the middle of the screen as an object carried by the character.

Drop: An object. Move the cursor over this icon and press ENTER, then select the object carried and press ENTER. The item will re-appear on the left of the screen as an object in the same location as the character.

■ The remaining icons on this screen are **Green monitor** (Movement screen), **Red monitor** (Battle screen) and **Guilt**.

■ **Hint:** Tools are normally activated using the following icons: **Activate/Object icon**. However, specialist objects may require an additional command icon, eg. The Self-Destruct unit (see **Objects briefing**). Such objects are activated using the following icons: **Activate/Command icon**.

■ Weapons are automatically activated in combat situations, but only if the character has a weapon held in the ready. Apply the following sequence of icons to the weapon of your choice which is already carried by the character: **Ready for use: Object icon**, the chosen weapon will then appear below the **Ready for use** icon.

Mission Briefing: Your first task is to be aware of some or all of the Epsilon team aboard Zoff V. Epsilon characters to be beamed down are armed if you perform the following commands on Mento's Objects screen you will establish a transporter link:

Pick-up/Enter

Transporter/Enter

Activate/Enter

Ballistic control/Enter

■ You will be presented with a choice of three locations. From top to bottom: **Fighter Bay Shuttle Bay (Top)** & **Shuttle Bay (Bottom)**. Choose one and press **Enter**. **Manto**, will be sent aboard **Zolt V**.

■ The commands necessary to beam the other members of the **Enigma** team aboard **Zolt V** are as follows:

ICON	ICON	ICON	ICON
Drop/Enter	Transporter/Enter	Activate/Enter	Transporter/Enter

■ A selection of characters will be presented in the middle of the screen. Move the cursor over the character of your choice and press **ENTER**. That character will be beamed aboard **Zolt V**.

■ **Hint:** Make sure the characters you beam down are armed!

7. Movement screen

■ You enter this screen by selecting the **Green monitor** icon on any screen related to the character in play. This screen enables you to command a character to move to another location in the game.

■ The screen illustrated below belongs to the **Manto** character during the opening moves of a mission. At left are a number of arrows. The filled arrow(s) show possible directions for the character to move. In the middle of the screen, a text description of the character's current location. At right are three other icons: **Red monitor** (Battle screen), **Yellow monitor** (Objects screen) and **Quit**.

■ To command a character to move simply place the cursor over any of the filled arrows and press **Enter**.

■ **Hint:** You can only move a character in the direction(s) indicated by a filled arrow. Occasionally, a character may refuse to respond. Either they are faced by a locked door and require a keycard (see **Objects briefing**) or they are about to be attacked.

8. Battle screen

- You enter this screen by selecting the **Real monitor** icon on any screen related to the character in play. This screen enables you to command a character to do battle.
- The screen illustrated below, belongs to the **Manto** character during the opening moves of a mission. As left will be deployed characters standing in the location selected. In the middle of the screen are the attack/retreat indicators. On the right are the icons which allow you to command a character to fight or retreat.

ICON

Location scan: This icon enables you to look into a character's current location or adjacent locations. Then you can count or identify other characters. They appear on the left of the screen.

ICON

Attack: This icon commands a character to do battle. If they are successful they will advance into the enemy's location.

ICON

Defend: This icon commands a character to stand fast and do battle.

ICON

Retreat: This icon commands a character to return to the next location.

- The remaining icons on this screen are **Green monitor** (Movement screen), **Yellow monitor** (Dialogs screen) and **Quit**.

Mission briefing: The following commands, when issued through a character's battle screen, will enable you to control a battle situation.

ICON

Attack/Enter

DON

Direction/Enter

■ The character's status icon will turn **Purple** (Commodore) or **Magenta** (Spectrum), indicating they are attacking. The battle continues until either your character or their opponent is slain.

■ **Hint:** Different weapons have different strengths (see **Objects briefing**). Battles are resolved in the same location as a character or between adjacent locations. The computer will tell you if a battle cannot be resolved.

The mission command screen

■ A three-section Mission Command Screen appears above the character screens at all times. The screen illustrated below is typical.

Status icons

View screen

Status icons: These change colour according to a character's status.

	Commodore	Spectrum
Inactive, ready for command	White	White
Moving	Blue	Blue
Attacking	Purple	Magenta
Defending	Orange	Cyan
Retreating	Yellow	Yellow
Pickpocket (Sovine)	Green	Green

Character weak	Colours become grey	Colours become more intense
Character dying	Black	Red

View screen: When you select a member of the Enigma Team the view (Commodore) or blind (Spiritus) opens. The character's view screen icon will be displayed in the middle of this window. If the icon does not flash the character is alone in the location. Otherwise a series of icons will flash on and off, showing the various characters in the location.
